

Innovation and quality since 1988

1988

THE EARLY DAYS

1988, Stefan Pütz founded his one-man planning office with a focus on automation software for production systems. Just ten years later, complete systems including mechanics and robotics were realized in Saarburg (Rhineland-Palatinate).

2007

GROWTH THROUGH TAKE OVERS

Since 2007, the Pütz Group has successfully guided companies through successions and insolvencies at various locations in southwest Germany. With their expertise, the service portfolio has been continuously expanded.

2024

THE PÜTZ GROUP TODAY

Today, the Pütz Group unites 13 companies at 9 locations in Germany. While product development is decentralized, central functions such as purchasing, human resources, marketing and controlling are managed on a group-wide basis. The close cooperation enables comprehensive, high-quality solutions beyond the individual companies' areas of specialization.

2026

FOCUS ON THE FUTURE

With a view to Industry 4.0, the Pütz Group is continuously investing in technology and capacities – for greater flexibility and consistently high quality.

**THERE IS STILL A LOT TO DO!
A WONDERFUL FUTURE.**
