

MACHINES AND EQUIPMENT
FOR THE BEVERAGE INDUSTRY

Swing stopper closing machine BVH 7

now with height adjustment feature as standard

FOR 7 000
SWING STOPPER
BOTTLES
PER HOUR

Thanks to the height adjustment feature included as standard, you can process different bottle heights.

Your benefit:

+ Optimum hygiene

- All components are designed to meet the latest hygiene considerations.
- The machine table and components are freely accessible and easy to clean.
- Faulty swing stoppers are recognised in the test star. The toggle remains on the bottle, so no dirt can get into the freshly filled bottles.
- At no time during the closure process does the swing stopper closing machine come into contact with the bottle's rubber seal. As a result, the latter cannot be contaminated during the closing process.

+ Reduction in follow-up costs

- thanks to the economical use of wear parts that can be replaced very quickly, if necessary.
- thanks to the exclusive use of high-quality, durable components. [Mostly in a stainless steel design]
- thanks to the continuous swing-stopper mechanism, which is gentle on the clip material. It can be reused for a very long time.
- The swing stopper closing machine has a maintenance-free gear drive.

+ Maximum availability

- The machine concept has been designed for 3-shift operations.
- The mechanical forced guidance of the toggles guarantees that the toggles are positioned centrally and straight. Once the toggle has been put in place, no further movement is possible!
- The swing stopper closing machine offers the best closure performance with a closure rate of 99%. [Highest closure rate on the market!]
- 95% of the maintenance can be performed by a mechanic. If necessary, support via a remote service is available within minutes and comes as standard.

*MACHINES AND EQUIPMENT
FOR THE BEVERAGE INDUSTRY*

Quality made in Germany: we use only high-quality motors and control components from well-known manufacturers.

The continuous closing operation with mechanically guided, smooth motion sequences allows for low-wear, optimum closure performances.

EVERYTHING FROM A SINGLE SOURCE

Thanks to our integration into the **PÜTZ GROUP** and the resulting **synergy effects** we are able to offer you not just machines and equipment for the beverage industry, but also the appropriate testing technology.

P.S.: Less paper! More digital!

FOR OVER 40 YEARS

we have been successfully
producing complex, customer-
specific individual machines
and complete systems for the
beverage industry.

We will get your production
on the path to success.

**We look forward to receiving
your request!**
