

Effective pre-cleaning for open viewing cases:

High-speed gripper jaw conveyor

Before beverage cases enter the washing system, coarse soiling such as broken glass or labels must be removed. The RICO clamping gripper conveyor is specially designed for open cases and enables safe, fast turning – for an efficient cleaning process and smooth further processing.

Your benefits:

- + **High performance:**
5,000 cases/h
- + **Precise and energy-saving**
thanks to motor with speed control
- + **Simple, quick conversion to other case formats**
 - Case widths 400–250 mm
 - adjustable to different case heights
 - Optional: Foldable side guide
- + **Low maintenance**
- + **Compact & space-saving**
- + **High-quality design in stainless steel**
- + **Special solutions on request**

High-speed gripper jaw conveyor

Quick and easy conversion to different case widths.

Optimized side guide – more flexibility, more safety

In contrast to conventional side guides that can be adjusted manually using adjusting screws, our foldable system offers a significantly faster and more user-friendly format changeover – even in hard-to-reach places.

This significantly reduces the risk of accidents and noticeably increases work safety.

Everything from a single source

Take advantage of the **synergy effects** that result from our integration into the **Pütz Group**!

In addition to machines and plants for the beverage industry, we are able to equip your plant with the most modern control and vision technology.
