

## PACKAGING MACHINE

### Weingut Schloss Fels

#### Plant planning possible on the smallest space

To plan a complete bottling and packaging line in which are integrated all required units, ranging from new glass to the pallets ready for dispatch on less than 200 m<sup>2</sup>, is really a challenge. Storage space that is indispensable for the smooth running operation must be reduced to a justifiable minimum.

Packaging machines have especially been reduced to your installation size and newly designed according to the plurality of your cardboards.

#### Scope of Delivery:

- Semi-automatic new glass removing system
- Packer type VARI, 1-head with universal packing head
- Cardboard turn-up system with hot glue
- Cardboard closer with hot glue
- Palletizer - robots with vacuum suction grippers
- Empty pallet magazine
- Bottle transport
- Package transport
- Pallet transport
- Packaged goods pallet stretcher
- Project planning and implementation

**PACKAGING MACHINE**
